## Can' t adblock plus firefox

uBlock Origin seems most recommended by Firefox, while most used by users, but Adblock has always been popular / safe, right? Is Adblock developing in Russia? Adblock Plus is the most popular browser extension available for Mozilla Firefox, Google Chrome, Opera and Android. Its main goal is to remove all intrusive ads from your browsing: YouTube video ads, Facebook ads, banners, pop-ups, pop-ups, background ads, etc. To block ads, Adblock Plus requires so-called filters to report that are claimed to be blocked. From the box, Adblock Plus comes without any filters, but will offer you to add a filter subscription at the first launch. With filters enabled, it can block specific requests from websites, usually ad requests. Blocked ads often leave blanks or Ad tags on webpages. Adblock Plus is still able to remove them with a functionality called item-hiding: based on certain specific features, Adblock Plus is able to hide certain elements from the webpage. Install Adblock Plus For Firefox If you are using the Mozilla Firefox browser, click the install button on the Firefox installation page. Firefox will prompt you to allow Adblock Plus to install the add-on: Click Allow. Firefox will start installing our ad block and ask you to confirm that you trust the author. Click Install now to add Adblock Plus to your Firefox browser. Now you are protected against all intrusive ads! For Chrome, Google Chrome allows two ways to install our ad-blocking software. The easiest way is through our website, the second way is through the Chrome Web Store. Install through our site in 2 steps Just go to the Chrome installation page and click on the install button to add ad blocking to the Chrome browser. Click Add when the following dialog box appears in your browser: Adblock Plus will be installed in your browser. You know it was successful if you received the following message: Install via Webstore on Google Chrome in three steps If you want to install Adblock Plus through the Chrome Web Store, please click here to open ABP. The following screen will open our adblock for Chrome: In this screen, please click the blue Add

to Chrome button in the upper right corner. After clicking on this button, you will be asked to add Adblock Plus to your browser: After confirmation, you will be protected against all intrusive online advertising from the most popular ads in the world blocker! For Opera To install Opera's Adblock Plus, go to the Opera add-ons page and click Add to Opera. The following pop-up menu will appear: Please confirm by clicking Install and Adblock Plus will block in your Opera browser. Android Adblock Plus is also available for Android devices. It is important to note that there are several limitations for non-rooted devices. To install Adblock Plus, you will to allow installation of the application from unknown sources: Go to Settings and go to Unknown Sources option (under Apps or Security depending on your device) Tap the check box and confirm the upcoming message with OK To download Adblock Plus for Android, access the Android installation page, download the app and open it. Once Adblock Plus is installed, enabled, and configured, all ads must be blocked. The first steps as described above, Adblock Plus requires filter lists to block ads. On its own, Adblock Plus can only see the webpage you're loading, but it should be told by the filter list that items to block. When you install Adblock Plus for the first time, it will automatically offer you a list of filters based on your browser's language settings. There are two main lists, EasyList and fanboy list. These two lists block ads from the most popular (often English) websites. However, these lists do not block ads on less popular national websites. For example, if you come from Germany, you will need to subscribe to the national German filter list. In this case, it will be EasyList Germany + EasyList. View all lists can be found here. It's important to note that you shouldn't add too many filter lists to Adblock Plus. This will slow down advertising, hence your browsing. As a rule, it is strongly recommended not to use overlapping filter lists (for example, select easyList OR fanboy list). You can also use filter lists to protect yourself from tracking, malware, social media tracking, etc. If you want to remove the filter list again, check this tutorial. In Firefox In Firefox, select Firefox &gt;&gt; Add-ons (for Mac OS X / Linux, select Tools from the menu &gt;&gt; Add-ons), this will open your Firefox Add-ons Manager. On Windows: On Mac OS X / Linux In the Add-on Manager under the Extensions tab you will find Adblock Plus: Please select Adblock Plus Account Access Preferences, and click on Filter Preferences: This will open adblock plus preferences menu: Please click on Add Filter Subscription and open the filter subscriptions drop-down menu to add new /filters. Select the list you want to subscribe to, Adblock Plus automatically activates these lists by default. This menu displays only the most popular and recommended filters. Please go here for more filter lists. In Google Chrome To add a filter subscription to Google Chrome, please select Settings from the menu in the upper-right corner. This menu can be found under the small icon with three horizontal bars: In the drop-down menu, select Settings. Then go to the Extensions tab on the left side of the screen. This will open extensions where you'll find Adblock Plus. Under the description, you can find the Options hyperlink. Please click on this link to open our adblock for the Chrome menu: In Adblock Adblock On the Options menu, you can see an overview of the installed and enabled filter lists. To add a new subscription to our ad blocker, select Add filter subscription. This will open a drop-down menu with the recommended and most popular filter sheet. Please select the list of filters you want to enable and click Add. If the filter you want does not appear among these pre-selected filters, please go here. In Opera To add a new filter list in Opera, please go to the Menu button (for Mac OS X / Linux, Tools), select Extensions &gt;&gt; Manage Extensions . This will open installed extensions, including Adblock Plus: To open the filter preferences menu, click the small tool icon on the right side. This will open the Adblock Plus Options menu, where you can add your subscriptions. Click Add filter subscription to access the drop-down menu with recommended and most popular filter lists. Here you can select the filter you want and click Add. On Android, it is not possible to select multiple filter lists. To change your filter list subscription, please open the Adblock Plus app and select Filter Subscription. This will open the menu where you can change your subscription. Disabling AdBlock Plus on commonly used sites Many websites depend on advertising revenue, and if you visit a website you may often want to allow their advertising. To do this, go to this site and click the Adblock Plus icon on the toolbar. From the menu you can select Disable ... by clicking the slider (you can undo this selection in the same way by clicking the slider again) and then clicking Refresh. It will add an exception rule like @@@| adblockplus.org^\$document to your filter list. You can find more information about exception rules in writing Adblock Plus filters. If you want to disable Adblock Plus on all websites, follow these instructions: Disable/Black Adblock Plus on all websites. Disable / Reenabling Adblock Plus on all sites in Firefox To disable or restore Adblock Plus in Mozilla Firefox on all sites, please access Add-ons Manager by going to Firefox &gt;&gt; Add-ons (for Mac OS X / Linux, select Tools from the menu &gt;&gt; Add-ons). Here's an overview of the add-ons currently installed. Find Adblock Plus here and just click Remove or click on the slider. If you want to reactivate adblocker on all sites, just click the slider again. For more detailed information on how to remove add-ons, please visit the Firefox page. It is important to note that Adblock Plus saves your preference settings, so if you reinstall ABP at a later stage, you do not need to settings. If you want to start clean with Adblock Plus you need to remove the adblockplus directory in your profile (how to find your profile). Also, you need to go to about:config and reset all preferences starting with extensions.adblockplus (to right-click mouse and select Reset from the context menu). In Google Chrome To disable or restore the Chrome Adblock Plus version, please go to Settings in the menu in the upper-right corner. Then select Extensions on the left side. Find Adblock Plus here and just click Remove or click on the slider. If you want to reactivate adblocker on all sites, just click the slider again. In Opera To disable or restore Adblock Plus for Opera, please go to the Menu button (for Mac OS X / Linux, Tools in the menu bar), select Extensions &gt;&gt; Manage Extensions. This will open your extensions menu. Find Adblock Plus here, select Uninstall and confirm this. On Android Uninstall Adblock Plus for Android is similar to any other app you downloaded: Go to Menu &gt; Settings &gt; Apps &gt; Manage apps (on Android 4.x devices, Settings &gt; Apps). Scroll through the list of apps to find the one you want to uninstall. Tap the app you want to uninstall. Click Uninstall. Problem solving What if Adblock Plus blocks too much? It may happen that Adblock Plus prevents some sites from functioning properly. Usually it's not a bug in Adblock Plus, but it's a problem with the filters (or filter subscription) you use, these filters say Adblock Plus to block something that shouldn't be blocked. You can check this by temporarily disabling AdBlock Plus if this fixes the problem that is dealing with a bad filter. Please report bad filters using the Report a problem feature on this webpage that will automatically collect important data from the current webpage: When asked about the problem type, please select Adblock Plus blocks too much: Your report will be automatically sent to the supporting filter list you are using. Please note that filter supporters do not respond to each of the many reports they receive. Your report will be more likely to be addressed if you provide additional information to make the problem more obvious and reproducible. What if Adblock Plus doesn't block an ad? If you found an ad that Adblock Plus doesn't block, please check first if you're using the correct filter subscription. For example, waiting for a French ad blocking filter subscription on a Bulgarian site is unrealistic – you need to add a subscription to this work. If the filtering subscription is correct, then subscription support probably just doesn't know about the problem, and you should tell it using the Problem Reporting feature on this webpage, which will automatically collect important data from the current webpage: When asked about the problem type, please select Adblock Plus does not block an ad: Your report will be automatically sent to the list you are using. Please note that filter supporters do not respond to each of the many reports they receive. Your report will be more likely to be considered if you information to make the problem more obvious and reproducible. Repeatable.
